REGIONAL GROUND WATER GROUP - CONTINENTAL HEAT TREAT, 10643 SOUTH NORWALK BOULEVARD, SANTA FE SPRINGS (FILE NO. 100.315)

Regional Board staff intends to initiate discussions on the formation of a formal regional ground water group in the Santa Fe Springs area. It is anticipated that the group would participate in developing a better understanding of the sources and extent of the ground water contamination in the area and help in determining appropriate remediation.

We hereby request that you or an appointed representative familiar with your facility's environmental issues be present at 9:00 am on August 20, 1998, at this Regional Board office at the above address. We will be focusing the discussion on the nature and extent of halogenated volatile organic compounds in ground water in the Santa Fe Springs area.

In order to facilitate this initial meeting, please bring with you summary tables providing any ground water monitoring data collected from your site and site isoconcentration plots depicting the extent of on-site and off-site ground water contamination pertaining to your site.

Thank you for your cooperation in this matter and please call Keith Elliott at (323) 266-7614 if you have any questions.

J.E. Ross, Unit Chief
Site Cleanup Unit
